Dorman Air Tanks can be used to supply air to air actuated parking brakes, air powered shocks, air powered seats, and air powered doors

- Cataloged by Original Equipment Manufacturer (OEM) number for easy identification during part replacement selection
- Additional measurement points for further verification, guaranteeing proper fit, form and performance just like OEM
- Program offers 3 different tank types - supply/wet, primary and secondary

**Quality & Safety Confidence**

- Manufactured per SAE J10 & FMVSS 121 Standards
- 100% of tanks are inspected & pressure tested to 3x of their working pressure (post production)
- All tanks are leakage tested before packaging placement
