Growing the Heavy Duty Aftermarket

Dorman knows anytime a wheel is removed for service, there is a greater risk of damaging or misplacing this critically important safety hardware.

Dorman expertise in wheel hardware – transferring that knowledge base in light duty over to MD and HD to meet market needs.

Dorman HD Solutions Wheel Checks – a safety inspection must have for servicing school buses and city municipal vehicles – provides visual assurance that your wheel has been and remains securely fastened.

Assortments and different packing options available.

Untrailered HD trucks use 10 lug nuts per wheel.

Dorman is the category expert with over 100 years of hardware experience.
