**Ignition Lock Housing**

*OE PROBLEM:* Internal cam housing breaks from fatigue of repeated ignition use.

*Redesigned with a 42% thicker housing and more rigid internal cam for greater durability.*

**Turbocharger Oil Lines**

*Construction of stainless steel with a heat wrap for additional thermal protection.*

- *Direct replacement matches the fit and function of the original equipment oil line*

**FAILURE MODE:**
- Oil leaks, loss of pressure or failed turbocharger

**TURBOCHARGER OIL LINES**

*LINE EXTENSION*  
*OVER 30 SKUS AVAILABLE*

**Fuel Pressure Relief Valve Cap**

*Matches the fit and function of the original part to restore lost performance from corrosion and debris buildup in the fuel system.*

- *Made of durable die-cast metal construction for a precise fit and reliable service*
- *Includes all new installation hardware and O-rings for a complete repair solution*

**FAILURE MODE:**
- Original valve cap fails due to corrosion, resulting in a vehicle no start condition

**Fuel Pressure Relief Valve Cap**

*Line Extension*  
*Over 15 Skus Available*

**Transmission Oil Cooler Lines**

*Includes bracket and retainer clips for a complete repair solution.*

- *Direct replacement for original equipment design*

**FAILURE MODE:**
- Corrosion of tube or rubber hose, crimp failure results in oil leaks and overheating

**Transmission Oil Cooler Lines**

*Line Extension*  
*Over 300 Skus Available*

**PRODUCT HIGHLIGHTS**

**FEATURED NEWLY RELEASED PRODUCTS**

---

**Trailer Brake Control Module**

LINE EXTENSION

Controls brake force on trailer brakes when vehicle is slowing or stopping

- Manufactured from high-quality materials and coated for corrosion resistance
- Plug and play design for an easy, direct-fit installation

**FAILURE MODE:**
- Internal electrical failure results in trailer brake communication error message on module

---

**Intake Manifold Control Valves**

LINE EXTENSION

OVER 20 SKUS AVAILABLE

- O-ring included for a complete repair solution
- Direct replacement for original equipment design

**FAILURE MODE:**
- Heat, age, normal wear and tear results in poor drivability and fuel economy

---

**Axle Shafts**

LINE EXTENSION

OVER 100 SKUS AVAILABLE

Distributes power from the differential to the wheel

- Complete assembly includes the inner axle shaft, outer axle shaft and U-joint for a complete repair solution
- Durable steel construction for a longer service life

**FAILURE MODE:**
- Bearing fatigues and causes damage to the axle shaft bearing surface, resulting in grinding and vibration noise from the axle area

---

**Console Lids**

LINE EXTENSION

OVER 45 SKUS AVAILABLE

- Includes all necessary mounting hardware for a complete repair solution
- Direct replacement for original equipment design

**FAILURE MODE:**
- Original console lid wears and tears over time

---

**Information Display Module**

LINE EXTENSION

Remanufactured display module for the radio station (AM/FM), climate control selections, time and outdoor temperature

- Upgraded resistor eliminates failure mode found in the original design
- Plug and play design requires no special tools during installation

**FAILURE MODE:**
- Faulty LCD display screen will have dead pixels

---

**Seat Cushion Pad**

LINE EXTENSION

Made of durable materials for long-lasting support and resiliency

- Direct replacement for original equipment design

**FAILURE MODE:**
- Original seat cushion collapses and no longer supports seat upholstery

---
